

CASE STUDY

Limerick Institute of Technology (LIT) is one of Ireland's fastest growing institutes of technology and has recently been approved for designation as a Technological University. LIT offers undergraduate, postgraduate and flexible learning courses to nearly 7,000 students.

Sustaining security and quality assurance when switching to online proctoring

THE CHALLENGE

When the Covid-19 pandemic necessitated a switch from traditional in-hall exams to emergency remote assessment, LIT sought an exam proctoring solution that would seamlessly align with existing tools in its student learning management system, Moodle, while maintaining GDPR compliance to build a simple and user-friendly experience for students.

THE SOLUTION

LIT staff considered a range of assessment options in order to meet individual programme and module needs, and this included online proctoring with Eximity specifically. LIT staff chose Eximity's live proctoring option where appropriate but also appreciated the availability of other exam modalities.

While the institution provided faculty with a spectrum of online options for assessment - online open book, online proctored exam, etc. - the security and integrity of a proctoring solution proved critical for some examiners, and Eximity's streamlined approach resonated with the needs of LIT Staff. Moreover, some LIT programmes have requirements to fulfill from external regulating bodies for accreditation purposes, and staff were reassured that Eximity provided highly secure live proctoring for online exams.

We valued Eximity's promptness and responsiveness in support, which plays a significant role in alleviating student anxiety during the often stressful experience of test-taking

Dr. Brendan Murphy, Head of Quality, Teaching and Learning

OUTCOMES

In the months since the onset of the pandemic, LIT has successfully run three exam sessions (almost 70 exams across two semesters, serving approximately 2,000 exam sittings).

“The proctored exams give us a degree of academic integrity and greater confidence,” said Dr. Brendan Murphy, Head of Quality, Teaching and Learning. “Our partnership with Examity allowed us to offer remote exams tailored to our institution’s needs and to our students. We valued Examity’s promptness and responsiveness in support, which plays a significant role in alleviating student anxiety during the often stressful experience of test-taking”.

LIT found that online proctoring proved to be a valuable tool in maintaining exam integrity and security. In particular, faculty and staff appreciated that they could quickly and easily review video evidence when issues of academic integrity arose.

While local programme boards will ultimately determine the future of online assessment at LIT after the pandemic, it is noteworthy that new skill sets have been developed at both institutional and at individual levels. This allows for greater choice of assessment modalities and the proctored exams offer additional potential for flexible online assessment in this context.

The proctored exams give us a layer of academic integrity and greater confidence. Our partnership with Examity allowed us to offer reputable remote exams tailored to our institution and to our students.
