

# Examity's new accommodations make it easier than ever to test online

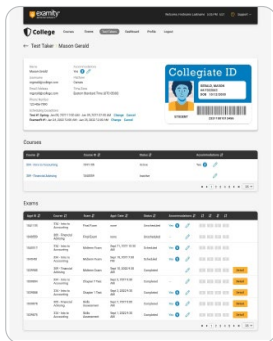

Introducing Examity's new accommodation features, designed to give you more control to create and manage the options that you value most for online exams.

As accommodations needs have grown rapidly in the marketplace, Examity developed a more intuitive and comprehensive system to handle them in our system, leading to a better experience for test administrators. Our new system includes the following features.

## Course specific accommodations

Accommodations can be applied at the course-level using our new system. This means that any accommodations added will apply to all exams within this course.

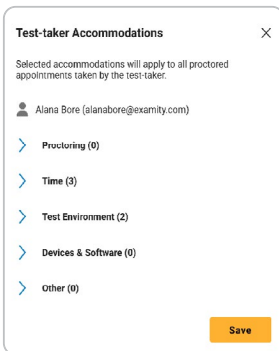

## User and exam specific accommodations

**Exam specific accommodations will be coming soon!**

In addition to being able to set an accommodation at the course-level for a specific user, accommodations will also be able to be applied to a specific user or exam and:

- Can be administered to every appointment a user takes
- Can be administered to every appointment for a specific user and exam (**coming soon!**)
- Allow the test sponsor to best assign them as per their test program's unique accommodation review process
- Provide more customization and focus on the individual test-taker

## Defined set of accommodations

We have defined a set of accommodations that can be selected, rather than relying on everything being imputed manually. This change will:

- Streamline the process
- Provide consistent language throughout Examity's platform
- Make it easier for partners to use and for our proctors to monitor

**We will now have five categories that will organize the types of accommodations that can be selected. The categories include:**

- Proctoring
- Time
- Test Environment
- Devices and Software
- Other

Additional accommodations can still be entered manually if needed, and all existing ones will be ported over automatically.
